

Goalie Stats Recorder User Manual

Companion recorder guide for new users

This guide is written for a new user and describes the current Hockey Goalie Stats workflow, including match setup, video review, reports, resources and backups.

Contents

- 1 1. Recorder purpose
- 2 2. Recording a shot
- 3 3. Shootouts and backup

1. Recorder purpose

Goalie Stats Recorder is the companion live-capture app. It exports JSON for the main app.

2. Recording a shot

- Choose outcome, situation, type, outnumbered and rebound result.
- Place heat-map points where applicable.
- Export soon after the match and import into the main app.

3. Shootouts and backup

Use the shootout section only when a drawn game proceeds to shootouts. Back up the main app after import.
