

Hockey Goalie Stats Main App User Manual

Complete guide for new users

This guide is written for a new user and describes the current Hockey Goalie Stats workflow, including match setup, video review, reports, resources and backups.

Contents

- 1 1. App purpose
- 2 2. Match setup and duplicate names
- 3 3. Video Stats Review
- 4 4. Video controls
- 5 5. Video timeline
- 6 6. Clip exports
- 7 7. Shot definitions
- 8 8. Reports
- 9 9. Resources and backup

1. App purpose

Hockey Goalie Stats stores goalie profiles, teams, matches, shots, heat maps, ratings, shootouts, video-review metadata, reports, backups and resources.

2. Match setup and duplicate names

When a goalie has more than one match on the same day against the same opponent, the app adds a number to the match name. The first match keeps the normal name, the second ends in 2, the third ends in 3, and so on.

3. Video Stats Review

- Open Video Stats Review from the match screen.
- Add Angle Videos creates an angle and selects one or more local videos.
- Edit Videos lets the user add clips, remove clips, and reorder clips for an angle.
- Only one angle should play at a time; pause stops all video/audio.

4. Video controls

Playback controls group Play, -5s, frame step and speed buttons together. Framing controls group Zoom -, Zoom +, Reset Framing, Full Screen and FPS together. Prev and Next clip controls are not shown.

5. Video timeline

The long video timeline shows Save, Goal and Angle Closed Off markers at their recorded video timestamps. Tapping a marker seeks back to that video moment.

6. Clip exports

Batch clip exports download each shot as a separate MP4. The browser may ask whether to allow multiple downloads; choose Allow when prompted.

7. Shot definitions

- Shot Outcome: Save, Goal or Angle Closed Off.
- Shot Situation: Normal Game Play, Penalty Corner, Penalty Stroke or 8 Second 1v1.
- Shot Type: 1st Shot, Rebound, In Game 1v1, Own Goal or Other.

8. Reports

Reports use the normal Hockey Goalie Stats shot records. Video-linked shots appear in the same heat maps, timelines, totals and reports as normal shots.

9. Resources and backup

The Resources screen is opened from the footer. Ordinary statistics backups include video-review metadata but do not include large local video files.
